

# Strip Packing Machine

Ideal for packing of Tablets, Capsules, Caplets & any regular shape products.

## Process :

DUMRA strip packing machine is suitable for packing tablets and capsules in its own hermetically sealed pockets. This offers better protection to packaged products and improves its self life. Strip packing machine is a double web laminated foil packing machine. Alu-Poly and Glassine-Poly foils [0.3 or 0.4 mm thick] are commonly used for packing of pharmaceuticals. Other laminated foils can also be used to pack different products.

The SEALING ROLLERS are made from toughened alloy steel so that knurling remain sharp for longer period which ensures air tight sealing. The rollers can be supplied with different types and sizes of knurling and cavities to suit particular products. The rollers are interchangeable easily. Automatic Product feeding system consists of Bulk hopper for product storage, feeder box/feed bowl and feed channel.

### Salient Features:

- cGMP model, Suitable for different heat sealable packing material.
- Available in 2, 4 & 6 Tracks.
- Controls panel with Digital temperature controller.
- A/c Variable Drive.
- Batch Code Printing.

### Optional Features:

- Pre Forming Rollers
- Emboss Type Batch Printing
- Conveyor belt
- Disc Feeding
- Perforation

### Technical Specification:

Model	DSTP- 2T	DSTP- 4T	DSTP- 6T
Output [Tablets/min]*	400-600	800-1200	1200-1800
Max.Foil Width	70 mm	140 mm	210 mm
Heating Load W	500x2	750x2	1000x2

\* Output depends on nature of product and pack size
